Dear Representatives Ruiz, Bucshon, Bera, and Miller-Meeks:

The undersigned national physician specialty societies and state medical associations commend you for introducing H.R. 2474, the Strengthening Medicare for Patients and Providers Act. This bipartisan legislation advances the ongoing need to provide financial stability to physician practices in order to preserve access to care for Medicare beneficiaries.

Providing an annual inflation update equal to the Medicare Economic Index (MEI) for Medicare physician payments is essential to enabling physician practices to better absorb payment distributions triggered by budget neutrality rules, performance adjustments, and periods of high inflation. It will also help physicians invest in their practices and implement new strategies to provide high-value care.

The annual "stop the Medicare payment cut" exercises are due, in no small part, to the fact that physician services do not receive the annual inflationary update that virtually all other Medicare providers can rely on to better weather periods of fiscal uncertainty. The COVID-19 pandemic further illustrated the challenges physicians endure due to the current broken Medicare payment system. While the temporary and partial patches that Congress has provided through 2024 were necessary under the current payment system, they are a distraction, exacerbate budgeting challenges for practices, and divert resources that both medicine and Congress could be spending on other meaningful health care policies and innovations. Therefore, organized medicine is united in support of a long-term payment solution that centers on annual inflationary updates.

Once again, we sincerely appreciate your leadership in introducing H.R. 2474, as this legislation promotes this key element of any comprehensive, meaningful Medicare physician payment reform plan. We look forward to working with you on this legislation to advance it through the House and Senate during the 118th Congress.

Sincerely,
