OBJECTIVES

1. Understand that stress is a normal reaction to abnormal situations
2. Learn how to offer practical assistance and support in the immediate aftermath of disaster and terrorism
3. Review Psychological First Aid Core Actions
PSYCHOLOGICAL FIRST AID DEFINED

- PFA consists of practices intended to provide comfort, care and support to those suffering from disaster-related stress
- Offered in the immediate aftermath of disaster
- It is designed to reduce the initial distress caused by traumatic events
- It can hopefully help mitigate any acute or long-term psychological harm
- Culturally informed and delivered in a flexible manner
- PFA can be done by anyone

PFA IS....

An evidence-informed modular approach to assist children, adolescents, adults, families, disaster relief workers and co-workers in the immediate aftermath of disaster and terrorism.
ADVERSE REACTIONS TO A DISASTER

- Physical: Difficulty breathing, chest pain, elevated blood pressure
- Emotional: Fear, anxiety, anger, loneliness, sadness
- Cognitive: Difficulty concentrating or remembering things, limited attention span
- Behavioral: Isolating self from others, startling easily, sleeping problems,
- Spiritual: Crisis of faith, questioning basic religious beliefs, displaced anger

POST-TRAUMA REACTIONS VARY

**5 Phases of Disaster Reactions**

1. **Warning or Threat:** people may feel vulnerable, unsafe
2. **Rescue:** also known as the “heroic” phase, people are in the “fight-or-flight” mode
3. **Honeymoon:** people feeling thankful, empowered
4. **Disillusionment:** People begin to realize the true impact of the event
5. **Reconstruction/recovery:** People coming to terms with their circumstances and the recovery task they are facing

**Transition to Recovery Focus**

</tbody>
</table>

**Core Action #1: Contact and Engagement**

- Establish a connection with survivors in a non-intrusive and compassionate manner
  - Introduce yourself and describe your role
  - Ask for permission to talk
  - Explain objectives
  - Ask about immediate needs
CORE ACTION #2: SAFETY AND COMFORT

- The goal is to enhance immediate and ongoing safety and provide physical and emotional comfort

CORE ACTION #3: STABILIZATION

- The goal is to calm and orient emotionally-overwhelmed and distraught survivors
CORE ACTION #4: INFORMATION GATHERING

- The goal is to identify immediate needs and concerns, gather additional information, and tailor PFA interventions
- It is used to determine:
  - Need for immediate referral
  - Need for any additional available ancillary services
  - Which components of PFA may be helpful

CORE ACTION #5: PRACTICAL ASSISTANCE

- Offer practical help to survivors in addressing immediate needs and concerns
  - Identify the most immediate need
  - Clarify the need
  - Discuss an action response
  - Act to address the need
CORE ACTION #6: CONNECTION WITH SOCIAL SUPPORT

- The goal is to help establish brief or ongoing contacts with primary support persons, such as family members and friends, and to seek out other sources of support.

CORE ACTION #7: INFORMATION ON COPING

- Provide information about stress reactions and coping to reduce distress and promote adaptive functioning:
  - Explain what is currently known about the event
  - Inform survivors of available resources
  - Identify the post-disaster reactions and how to manage them
  - Promote and support self-care and family care practices
CORE ACTION #8: LINKAGE WITH COLLABORATIVE SERVICES

- The goal is to link survivors with available services needed immediately or in the future.

REQUIREMENTS FOR PFA PROVIDERS

- PFA providers must have the:
  - Ability to work in chaotic and unpredictable environments
  - Capacity for rapid assessment of survivors
  - Ability to provide services tailored to timing of intervention, context, and culture
  - Ability to tolerate intense distress and reactions
REQUIREMENTS FOR PFA PROVIDERS (CONT.)

- PFA providers must be able to:
  - Accept tasks that are not initially viewed as mental health activities
  - Work with diverse cultures, ethnic groups, developmental levels, and faith backgrounds
  - Have the capacity for self-care

DELIVERING PFA

- When delivering PFA:
  - Observe first
  - Ask simple respectful questions
  - Speak calmly and slowly without jargon
  - Be patient, responsive, and sensitive
  - Acknowledge the survivor’s strength
SOME BEHAVIORS TO AVOID

- When delivering PFA avoid:
  - Making assumptions about experiences
  - Assuming everyone will be traumatized
  - Labeling reactions as “symptoms,” or speaking in terms of “diagnoses”
  - Talking down to or patronizing the survivor

KEEP IN MIND….

- What type of disaster is it? Natural or human causes?
- Did people have any warning of the event?
- When did the event occur? Are families separated because it happened during the day time?
- Were there injuries? Deaths?
- How long will people be impacted?
- Are there enough first responders?
- Children may not understand. They only know that their loves ones are upset.
- Seniors may have vision, hearing or issues with being confused.
- Be sensitive to cultural and ethnical differences. Our style of grieving, reacting, and responding may be different from their style.
- For those who speak English as their 2nd language, they may revert to their primary language during times of stress.

- Attitudes towards authority figures may be shaped by past experiences.
- Have they experienced disasters in the past?
- If their financial resources are limited, this situation may be even more stressful.
REMEMBER

- Survivors react in a variety of ways
- Stress is a normal reaction to abnormal situations
- Do not force people to share their experience
- Give practical suggestions that promote self-efficacy
- Don’t make assumptions about what survivors are experiencing
- Additional mental health support and services can be accessed, if needed
- Anniversary dates can “trigger” stress

RESPONDERS AND RESILIENCY

- Possible First Responder Reactions
  - Unrelenting fatigue
  - Pace change
  - Cynicism
  - Dissatisfaction with routine work

- Self-Care
  - Be aware of signs of stress
  - Get in a routine
  - Maintain a healthy diet and exercise regimen
  - Maintain social connections
  - Take time off
  - Practice relaxation techniques
