Department of Family and Community Health
School of Medicine
The University of Texas Health Science Center at San Antonio

The Nature of Knowledge

- "I**nformation**" is inherently static while "**learning**" is dynamic and generative (creative). In *The Fifth Discipline,* Peter Senge, said: "Learning is only distantly related to taking in more information…"
- Classically, taking in more information has been the foundation of medical education. Traditional CME has perpetuated the idea that "learning" is simply accomplished by "learning more facts."
