March 16, 2020

Because of the events regarding COVID-19 in Massachusetts, America, and the world, this issue of *Vital Signs This Week* will be dedicated to COVID-19 coverage. Please find below information and resources from trusted health care, government, and news organizations.

Starting next week, we'll begin publishing a special COVID-19 e-newsletter that will provide you and your patients the latest trusted information and tools. We will use this channel, and others, to relay important updates to you.

The [MMS COVID-19 webpage](#) is updated regularly with the latest information and resources from public health authorities.

News & Announcements

2019 Novel Coronavirus (COVID-19)

Illustration by CDC/Alissa Eckert, MS; Dan Higgins, MAMS

MDPH issues updated COVID-19 testing guidance

Today, the Massachusetts Department of Public Health (DPH) issued new guidance for testing of persons with suspect COVID-19 through the Massachusetts State Public Health Laboratory. The new guidance outlines changes in testing prioritization are aimed at identifying places where public health action could be used to slow the transmission of disease and to protect individuals at increased risk for severe illness and the healthcare and critical infrastructure workforces. The new testing prioritization is based on the CDC's current [person under investigation \(PUI\)](#) criteria as well as the current epidemiologic situation in Massachusetts.

In addition, two commercial laboratories, Quest and LabCorp have received federal approval and have begun offering testing for COVID-19. They are expected to gradually increase their test capacity for patients who should be tested. We anticipate these changes will help alleviate some of the current confusion and frustration surrounding coronavirus testing. For additional clinical questions about testing, test results, specimen transport, or control measures, contact MDPH (24/7) at 617-983-6800. [Read the full DPH release »](#)

Governor's Declaration Allows for Additional Resources

As the number of coronavirus (COVID-19) cases continued to rise, Governor. Charlie Baker declared a state of emergency in Massachusetts this week. State officials promulgated a number of new protocols and guidelines for both health care clinicians and facilities as well as individuals in an effort to slow the spread of the COVID-19 virus and support the Commonwealth's response to the outbreak of Coronavirus.

MDPH Policies and Procedures for Restricting Resident Visitors in Nursing Homes and Rest Homes and Personal Protective Equipment Recommendation Updates during the COVID-19 Outbreak

Nursing homes and rest homes should implement the outlined provisions effective March 12th to protect the health and safety of residents and staff during the 2019 novel Coronavirus (COVID-19) outbreak. [Read more »](#)

Newly released COVID-19 related information for MassHealth providers

In coordination with agencies across the Executive Office of Health and Human Services, MassHealth/ EOHHS have released provider bulletins and additional guidance in

response to 2019 novel Coronavirus Disease (COVID-19). These policies expand telehealth coverage, including telephonic coverage, expand coverage through Hospital-Determined Presumptive Eligibility (HPE), provide information for providers to bill for COVID-19 lab testing, cover 90-day refills of prescriptions and early refills, and remind providers that there are no copays for lab tests and pharmacists cannot deny medications if a member cannot pay. The bulletins and guidance are based on what is currently known about the transmission and severity of COVID-19 and will be updated as needed and as additional information is available. Mass. reports 15 new coronavirus cases, increasing state count to 28 (WBUR)

Of the presumptive positive cases announced today, eight are men and seven are women. Five are from Suffolk County, five are from Middlesex County and another four are from Norfolk County. The number also includes a woman whose place of residence DPH could not confirm, according to a statement. In all, 23 of the 28 Massachusetts residents with coronavirus attended the biotech company's conference, held last week at the Marriott Longwharf in Boston and attended by roughly 175 people. Of the remaining five cases, three are connected to travel to northern Italy, one is connected to travel to China, and one has no known connection to either travel or the conference. [Read more »](#)

Biogen's coronavirus cases rise (BBJ)

Approximately 26 employees at Biogen, 23 of whom live in-state, have now tested positive for the coronavirus COVID-19 after attending a company meeting late last month — including one employee who then attended another biotech conference elsewhere in Boston the following week that was attended by hundreds. More than a dozen new cases were identified over the weekend, the state Department of Public Health disclosed on Sunday. As of Sunday night, approximately 28 Massachusetts residents have now tested positive for COVID-19 cases, prompting the shutdown of two schools in Wellesley and a rush of testing requests at local hospitals. Boston startup using AI, remote monitoring to fight coronavirus (Fierce)

A Boston-based startup has been tapped to help doctors and researchers in Hong Kong combat the growing coronavirus outbreak. Biofourmis is using its wearable and artificial intelligence technology to aid with disease surveillance and to help researchers better understand the illness. The company's technology is being used as part of a first-of-its-kind national disease surveillance program administered by the University of Hong Kong for Hong Kong's Department of Health, Biofourmis CEO Kuldeep Singh Rajput told FierceHealthcare. A mayor, 54 nurses under quarantine in Berkshire County (MassLive)

The mayor said he and LaForest have an obligation to model best practices and follow instructions set out by public health officials. Bernard added that he has heard many people use the phrase "abundance of caution," which guided his decision to self-isolate. "As a father, nurse, and elected official, I take precautions for the transmission of and illness extremely seriously," LaForest said in a statement shared by Bernard. "Hopefully my symptoms are related to a simple cold and not the COVID-19 virus." [Read more »](#)
