- Communicate Throughout

"The Massachusetts Medical Society will continue to be a proactive organization. We will advocate for the shared interests of patients and our profession. We seek to unite all physicians and serve the common interests of the profession. Our goals are to enhance and protect the physician-patient relationship and to preserve the physician's ability to make clinical decisions for the benefit of patients. The Society will continue to encourage the development of standards for high quality care. We will continue to promote our code of ethics to physicians, patients, and the public. We will work collaboratively within the profession and with the public. The Society will address the professional needs of physicians and take a leadership role in the development of health care policy. We will promote medical education, training, research, and the continuing education of physicians. We will communicate clearly and effectively with our members and the public to build awareness of and support for our goals."
“Nothing happens unless first a dream.”

“I have a dream, that my four little children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character. I have a dream today!”
