Massachusetts Medical Society Antiracism Action Plan

Your partner. Your advocate.

624 media placements
From the President

Serving as president of the Massachusetts Medical Society was the realization of a professional dream, but I certainly couldn’t have dreamed of the challenges we faced together.

We encountered simultaneously two public health crises — a global pandemic that upended our way of life and the crisis of inequity that has cost lives since the beginning of our country.

The silver lining through this year was that we were fortunate to be in a prime position to be a trusted voice and collaborator, thanks, in no small part, to my predecessor, a gifted and compassionate leader, Dr. Maryanne Bombaugh.

We formed an equity plan with the explicit goal of avoiding performative antiracism. The lens of equity was applied not only to our efforts on COVID-19 but was foundational in each and every advocacy initiative undertaken on behalf of our patients and our profession.

I am so incredibly proud of all of you for your support in taking meaningful steps toward becoming an antiracist organization and in our forming of policies that will forever amplify our impact in eliminating disparities in health care access and delivery.

I thank you for your courage and your empathy during an unprecedented and difficult time.

We know that neither crisis — COVID or inequity in health care — is over. What we do know is that we, the members of the Massachusetts Medical Society, will continue to rise as one in the face of these and any future crises. We will fulfill our mission and deliver on the promise that health, in all its dimensions, to all people, is a basic human right.

I offer my best wishes to Dr. Carole Allen, an incredible physician, advocate, and leader, and a great friend, in her term as the 139th president of the Massachusetts Medical Society.

David A. Rosman, MD, MBA
President, MMS, May 2020–May 2021

From the Executive Vice President

Of the many momentous changes in medicine this year, perhaps the most significant is the commitment of our Massachusetts Medical Society and other organizations locally and globally to addressing racism in medicine. The MMS has created a process to ensure that our commitment to antiracism reaches every facet of our business.

- As a member organization, the MMS recognized racism as a public health crisis and committed to being an antiracist organization. That policy became action through the creation of and execution on an Antiracism Action Plan. We have offered educational programs on creating more inclusive work environments and identifying and addressing racism in medicine.
- As a publisher, NEJM Group increased race and medicine content across our portfolio and updated publication style guides to address race and ethnicity language and usage. NEJM Group also became an inaugural collaborator on ProjectIMPACT to improve health equity by aiding clinicians in accurately diagnosing disease in dark skin.
- As an equal opportunity employer, our diversity, equity, and inclusion (DEI) work to increase diversity in hiring has been a long-standing commitment. This year, the Society conducted DEI awareness training for all employees and engaged employees through a speaker series and participation in a DEI council and related workstreams.

Just as our strategic plan builds toward the long-term relevance and sustainability of the Massachusetts Medical Society, so does our commitment to equity for every physician, every patient, and every one of our employees. The MMS dedication to diversity, equity, and inclusion is resolute and unwavering. DEI is fully aligned with our organizational values, and we are proud to make DEI a part of our organizational DNA.

Lois Dehls Cornell
Executive Vice President, MMS
Dismantling racism in medicine and health care came to the fore as a high-priority issue for the MMS. Against the backdrop of a broader societal reckoning over violent police interactions, the disproportionate incidence of COVID-19 infection and mortality in communities of color forced an overdue acknowledgment of the other pandemic: racism.

The Medical Society pledged to address structural racism and inequities affecting our members, the larger medical community, and especially our patients. To help guide this work, MMS President Dr. David A. Rosman convened the MMS Antiracism Advisory Group to listen to physicians’ experiences, to learn from diverse perspectives, and to develop recommendations for how best to fulfill the commitment to becoming an antiracist organization.

In November, the Medical Society released its Antiracism Action Plan, which provides a framework for uncovering and eliminating racism and implicit bias affecting MMS members, Massachusetts physicians, patients, and public health. The plan establishes measures to hold the Medical Society accountable for its progress as it moves forward with its long-term work to root out structural racism and achieve racial equity.

At the December 2020 Interim Meeting, the MMS officially recognized racism as a public health crisis and further committed itself to promoting equity and racial justice by prioritizing antiracism in the Medical Society’s policies, strategic plan, governance, and activities.

“Racism permeates all sectors of society. Health care is no exception. ... The Massachusetts Medical Society will ensure that our commitment to working for the best possible health care for all patients is focused by the lens of equity and racial justice.”

— David A. Rosman, MD, MBA
President, MMS, May 2020–May 2021

The MMS Antiracism Action Plan describes underlying principles and key objectives the MMS will employ to create and maintain change as it works to become an actively antiracist organization.
A Year of COVID-19: The MMS Acts for Physicians and Their Patients

Since the first cases of COVID-19 were confirmed in the Commonwealth in 2020, the Massachusetts Medical Society took action to ensure that the state’s physicians had a voice in the response and received crucial information rapidly. The MMS assumed a leadership role in continual communications with members, the broader medical community, the Baker-Polito Administration, the Massachusetts Department of Public Health (DPH), Division of Insurance (DOI), and other stakeholders to convey concerns and advocate for physicians and patients.

The Medical Society continued to host calls with DPH officials, who briefed members directly on emerging information and answered questions. Through an MMS series of COVID-19 Virtual Member Forums, physicians heard from experts on timely topics including school reopening, the needs of vulnerable populations, and latest developments and resources regarding available COVID-19 vaccines.

Calls with the DOI raised awareness of payer policy changes and provided opportunities for physician practice concerns to be addressed.

As vaccine became available for health care workers, the MMS worked with the Commonwealth’s COVID-19 Command Center and DPH in collaboration with Mass General Brigham to facilitate vaccine distribution to independent and specialty practices.

The Society also raised awareness of vaccine access challenges and hesitancy in underserved communities and pushed for recognizing the important role of trusted, community-based physicians in vaccinating vulnerable residents quickly and equitably.

NEW: COVID-19 Vaccine Resource Page

Information on the COVID-19 vaccines and the state’s vaccine allocation plan

Informing and Advocating for Physicians

- 94 MMS Planning and Preparedness e-newsletters
- 10 calls/month with COVID-19 Command Center
- 13 informational calls between DPH and MMS physicians
- Coordinated distribution of ~300 doses of vaccine for staff in physician practices
MMS Members: Connected and Engaged while Apart

As the state’s largest physician-led organization, the Massachusetts Medical Society remains focused on its mission to support the medical profession while promoting access to quality care for patients throughout the Commonwealth.

The majority of the Society’s work this year focused on providing support to physicians and other health care providers so they could better assist patients amid the extraordinary challenges of the pandemic.

Despite the need for the MMS to pivot and conduct the Society’s activities virtually, MMS members continued to advance policies and engage with colleagues through the Medical Society’s committees and sections.

Robust policy-making sessions at the Interim Meeting (late 2020) and Annual Meeting (spring 2021) reflected great ingenuity and effort by members and staff to recreate the highly democratic and collaborative MMS policy-making process in virtual sessions. Dozens of proposed and debated policies adhered to priorities articulated in the MMS strategic plan while also addressing new challenges raised by the pandemic and the year’s social issues.

Members continued to engage in other activities and events that supported connection among physicians across the state, including:

- A virtual program that addressed “10 Action Items to Combat Racial Bias in Medicine,” co-sponsored by the Society’s Committee on Diversity in Medicine, the Minority Affairs Section, and the International Medical Graduates Section
- Growth of the two-year-old Women Physicians Section in member interest and successful work in MMS policy-making
- A webinar for medical students to learn about private practice, sponsored by the Committee on the Sustainability of Private Practice
- Online and outdoor in-person events hosted by the Member Interest Network (MIN) on topics ranging from Massachusetts birding and wildflowers to musical performances and virtual art exhibits by members

Left: HOD Speaker Francis P. MacMillan Jr., MD, and Vice Speaker Melody J. Eckardt, MD, MPH, deftly presided over virtual policy-making sessions. Above: Dr. Canan Avunduk, her husband, Bill, and guests enjoy a September hike at Wachusett Meadow, organized by the MIN.
Public Health and Health Policy

COVID-19 and the push for racial equity in health care dominated the Medical Society’s work in public health and health policy this year. Results were evident in our contributions to state policy and in our continued commitment to health care as a human right and equitable care for all.

Drawing upon years of strong relationships and mutual respect, MMS leaders and staff worked closely with the Massachusetts Department of Public Health (DPH) on behalf of physicians and patients, and individual members were called upon to serve in advisory roles to state health policy entities. Ongoing informational calls hosted by the MMS with DPH officials conveyed the concerns and perspectives of our member physicians and provided an opportunity for members to hear emerging information from the DPH.

Throughout the year, virtual member programs overseen by the MMS Health Policy and Public Health team included the following:

- “Psychological First Aid: Healthy Recovery Now and in the Aftermath of the COVID-19 Public Health Crisis,” a live webinar attended by 304 participants in July 2020, focused on the physical and emotional trauma endured by physicians and others on the pandemic’s front lines and how Psychological First Aid can ameliorate those effects. The program was sponsored by the MMS and its Committee on Mental Health and Substance Use and the Committee on Preparedness and by the Massachusetts Psychiatric Society. It is available as an online educational program.

- “Redefining Global Health in the 21st Century,” hosted by the Medical Society’s Committee on Global Health for medical students, trainees, physicians, and other health professionals, addressed global health education during COVID-19; included a presentation on Horizontal Systems Strengthening in Global Health; and provided an opportunity to participate in a Healthcare Design Thinking Workshop hosted by MIT Hacking Medicine.

- The 17th Annual Public Health Leadership Forum: “Stigma and Illness” examined how to address the stigma that adversely affects patient outcomes and worsens the already unacceptable disparities faced by people of color and other marginalized populations. It is also available as an online educational program.

Simone S. Wildes, MD (left), chair of the MMS Committee on Diversity in Medicine and vice-chair of the MMS Committee on Public Health, served on Governor Charlie Baker’s COVID-19 Vaccine Advisory Group and the state Department of Public Health’s COVID-19 Health Equity Advisory Group.

MMS Member Asif Merchant, MD, FACP, CMD, CPE (center), chair of the MMS Committee on Geriatric Medicine, served as the Society’s representative on the governor’s COVID-19 Vaccine Advisory Group, which was chaired by MMS member Paul Biddinger, MD (right).

The MMS hosted 13 informational calls regarding COVID-19 for member physicians with the state DPH.
Advocacy and Government Relations

The MMS advocates on behalf of the state’s physicians and patients by testifying on pending bills, drafting legislation, analyzing regulatory proposals and executive orders, facilitating grassroots member advocacy, and collaborating with aligned organizations. The MMS also shares its expertise with legislators, staffers, and others to keep physician and patient perspectives at the center of vital issues.

MMS advocacy on key topics this year included the following:

**Telemedicine**
- Successfully advocated and negotiated telemedicine legislation that secured broad coverage mandates for patients and select reimbursement parity requirements; secured coverage for audio-only telehealth; and prohibited insurers from driving telehealth to third-party platforms
- Led statewide physician efforts to secure optimal regulatory implementation of telehealth law

**Physician Payment and Billing**
- Advocated successfully for supplemental payments and deferred payment reductions to the Medicare fee schedule
- Contributed significantly during congressional negotiations for the No Surprises Act passed to protect patients from receiving surprise medical bills for out-of-network care

**Women’s Health**
- Advocated for passage of the ROE Act, which protects and expands access to abortion care in Massachusetts
- Supported creation of a special legislative commission, with an MMS representative, to study and make recommendations to address racial inequities in maternal health
- Successfully supported state efforts to extend Medicaid postpartum coverage from 60 days to one year

---

**In Washington, DC**
Met virtually with staff from all 11 members of the Massachusetts congressional delegation and directly with 7 members, to advocate for optimal federal responses to COVID-19, telemedicine, and Medicare payment policy

**In Massachusetts**
- Filed 12 bills in state legislature
- Testified on over 30 bills
- Met with 7 regulatory agencies and commented on several proposed regulations

MMS president-elect Dr. Carole E. Allen (top left), MMS physician members, and MMS staff met with Congresswoman Katherine Clark and her team during the National Advocacy Conference in February 2021, a yearly American Medical Association meeting that brings together health experts and political insiders to discuss the future of health policy. During meetings that the MMS arranged with the entire Massachusetts congressional delegation, the Medical Society advocated for policies to address COVID-19 relief, health inequities, telehealth, and health care reform.
Supporting Physicians and Their Practices

The MMS responded rapidly to assist physician practices during the COVID-19 pandemic, while maintaining momentum of ongoing initiatives for physician wellness, practice efficiency, and health equity. Successful efforts of the Practice Solutions and Medical Economics team included the following:

Wellness and Burnout
- Convened ongoing roundtable discussions for Massachusetts chief wellness officers and other physician leaders to offer a learning and collaborative environment for sharing experiences on well-being initiatives in their organizations
- Received signed Commitment Letters from 120 hospital and physician organizations that pledged to address physician burnout, in response to a mailing sent to CEOs and CMOs by the MMS in collaboration with the Massachusetts Health and Hospital Association (MHA)

Telehealth
- Spearheaded the Telehealth Initiative that supports physicians in Massachusetts and throughout the nation in implementing telehealth to ensure practice efficiency and to facilitate positive experiences for patients and physicians
- Hosted 10 public meetings with the Division of Insurance and MHA to troubleshoot member payer issues including prior authorization and telehealth coverage and reimbursement
- Interviewed 35 national and local experts for the thoughtful and thorough MMS report “New Directions in Health Care: The Massachusetts Telemedicine Imperative”

Diversity, Health Equity, and Inclusion (DHEI)
- Developed a comprehensive four-part educational webinar series with the MHA on DHEI best practices that has been viewed more than 1,200 times

Member Services
- The Physician Practice Resource Center addressed hundreds of calls from members on telemedicine, practice reopening, payer and billing issues, COVID-19 testing, PPE, and COVID-19 vaccine rollout
- Created and distributed the Practice Impact Survey (2.0) in November 2020, which yielded over 220 responses that helped identify the pandemic’s impact on physicians and their patients and informed subsequent MMS actions

120 hospitals and physician organizations pledge to address physician burnout
Hosted 10 public meetings with the Division of Insurance and MHA regarding payer issues
>1,200 views of the MMS-MHA webinar series on Diversity, Health Equity, and Inclusion

FOCUS ON DHE&I
Diversity, Health Equity, and Inclusion Best Practices Series
The Voice of Physicians across the Commonwealth

The Massachusetts Medical Society is a trusted leadership voice in health care across Massachusetts and the nation, and it continues to be a powerful and unwavering advocate for physicians and their patients, public safety, and data-driven health policies.

The Medical Society’s Communications team informs members, other health care professionals, legislators, regulators, and the public of our policies and advocacy efforts through our website and social media, and via engagement with local, trade, and national media. Our member communications — the Vital Signs publication and Vital Signs This Week e-newsletter — provide updates on upcoming MMS, professional, and educational events, and topics of interest.

In the media this year, MMS leaders served as a constant and respected voice on COVID-19.

President David A. Rosman participated in 55 on-the-record media interviews. He was a leading voice on COVID-19 and health care disparities and on advancing the MMS’s position on legislative and public health issues such as surprise billing, health equity, and COVID-19 vaccination.

Engaging Members and the Public

At the height of the COVID-19 surge in the summer of 2020, the MMS worked with New England’s professional sports teams to remind residents to #MaskUp. By harnessing the reach of the teams’ social media followers, we expanded the MMS’s presence in the public eye. As vaccines became available, the MMS was invited to join the state Department of Public Health’s COVID-19 Communications Advisory Group to help develop messaging for the state’s Trust the Facts. Get the Vax advertising campaign, which is geared toward communities where vaccine confidence was low.

To communicate, support, and connect with our diverse member audience, the MMS did the following:

- Developed a new Vital Signs article feature, “Member Making a Difference,” to highlight the many ways our members make an impact on their communities, patients, and profession
- Increased social media posts about our members to promote their accomplishments and strengthen their community
- Expanded video offerings to reach younger members, health care professionals, and the general public
- Created an official MMS President Twitter handle to reflect and amplify the voice of the physician
- Vital Signs, the MMS History Committee, and the president of the New England Medical Association collaborated to share stories of the state’s pioneering Black physicians.

To view MMS videos created to educate the public on COVID-19 safety, click on the images above.
NEJM Group

NEJM Transitions to UCC Platform

The New England Journal of Medicine successfully transitioned onto a new platform in June 2021, representing a major milestone in the NEJM Group initiative to unify customer, commerce, and content systems (UCC). This 18-month effort involved more than 100 people across every part of the publishing organization. Four million users of the flagship journal were migrated to the new platform.

With the move to UCC, NEJM and NEJM Catalyst customers will enjoy a greatly enhanced user experience. In addition to unifying the customer experience, the UCC initiative consolidates and modernizes systems. By building out and expanding commerce, customer, and related capabilities, UCC provides a technology foundation to better support existing and future products.

NEJM Healer Launches for Online Learning

In May 2021, NEJM Group launched NEJM Healer — an online learning application to teach and assess clinical reasoning. NEJM Healer provides medical schools, physician assistant programs, and residencies with the tool they need to improve clinical reasoning instruction and is at the vanguard of establishing clinical reasoning as a recognized and tested core competency in medical education. Education Management Solutions is working with NEJM Group to distribute NEJM Healer to US medical schools.

“NEJM Healer represents a major advance in the ability to teach, learn, and measure clinical reasoning,” said Jeffrey M. Drazen, MD, NEJM Group editor. “It teaches learners how to think like an experienced clinician in a way that is difficult for experts themselves to explain.”

NEJM Healer is available now at www.simulationiq.com/nejm-healer.

New Collaboration Addresses Structural Racism

VisualDx, Skin of Color Society, and NEJM collaborated in the fall of 2020 to develop a four-part webinar series addressing structural racism and racial bias in medicine. Dark skin is significantly underrepresented in medical literature and curricula; consequently, clinicians of all licensures and specialties are often insufficiently trained to recognize disease patterns in patients of color. The webinar educates providers on structural racism, disease patterns in dark skin types, and culturally competent care and has received nearly 17,000 views to date from over 100 countries.

ProjectIMPACT was later formed in February 2021, with NEJM Group as an inaugural collaborator, to raise awareness and adoption of educational and clinical resources and solutions that bolster clinicians’ ability to accurately diagnose disease in black and brown skin and improve health equity. Learn more at www.visualdx.com/projectimpact.

World-Leading Content on COVID-19

NEJM made a significant contribution to worldwide COVID-19 knowledge by publishing more than 500 coronavirus pieces (articles, letters, podcasts) from January 2020 through June 2021.

In January 2021, a COVID-19 vaccine resource page was added to NEJM.org to help clinicians stay informed of this important public health effort. FAQs written and frequently updated by Paul Sax, MD, provide frontline clinicians with answers to patient inquiries. More recently, over 200 NEJM COVID-19 articles (already free on NEJM.org) became freely accessible through PubMed Central.
MMS/NEJM Group Continuing Education, Accreditation, and Recognition

The MMS is a national provider of continuing medical education (CME) and has been awarded the status of Accreditation with Commendation by the Accreditation Council for Continuing Medical Education (ACCME). *This six-year accreditation term, achieved in December 2020, recognizes excellence as an accredited continuing education provider and honors the MMS for delivering CME programs that meet rigorous standards for educational quality and independence.*

The MMS develops, accredits, delivers, and reports annually on more than 260 CME and Maintenance of Certification (MOC) activities in conjunction with NEJM Group, MMS committees, and joint providerships or partnerships with other organizations. The MMS also recognizes more than 45 hospitals and other health care organizations so that they may accredit their own CME activities through the MMS Recognized Accréditor Program, which in 2020–2021 expanded regionally to include accredited providers from Rhode Island and Connecticut.

The MMS shifted its live educational activities to virtual webinars and meetings to accommodate learners during the COVID-19 pandemic. *During the past year, many educational activities focused on COVID-19 and diversity, equity, and inclusion.* This year’s premier activities, part of the MMS’s Annual and Interim Meetings, featured prominent faculty and yielded excellent attendance and feedback.

- **Joan Y. Reede, MD, MS, MPH, MBA**, dean, Diversity and Community Partnership, Harvard Medical School, delivered the 2020 Annual Oration, a signature event that dates back beyond 215 years, on *Diversity in Medicine Matters: The Rewards of a Diverse Workforce.*
- **The Annual Education Program 2021: Reimagining Health and Equity in a Post-COVID-19 World** featured Dr. Reede; Rochelle P. Walensky, MD, MPH, director, Centers for Disease Control and Prevention; Patrice A. Harris, MD, MA, immediate past president, American Medical Association; and Michael A. Curry, Esq., president and CEO, Massachusetts League of Community Health Centers.
- **The 131st Shattuck Lecture, COVID-19 in 2021: Lessons Learned and Remaining Challenges**, featured Dr. Anthony Fauci, director, National Institute of Allergy and Infectious Diseases. It *had the highest attendance of any NEJM/MMS live educational activity to date with over 1,000 participants.*

Each of these activities, plus numerous others, are offered on the MMS website as an online activity for CME credit.
