The MMS will continue to monitor developments related to public health emergencies and share timely and important information as it becomes available.

Public Health

Join MMS, Mass. DPH, and BPHC for a live webinar at 5:30 PM on Wednesday, Sept. 21 on the use, clinical indications, and EA-IND process for Tecovirimat (TPOXX) treatment of monkeypox

The Massachusetts Medical Society (MMS), the Massachusetts Department of Public Health (DPH), and the Boston Public Health Commission (BPHC) will convene a webinar to update physicians on tecovirimat (TPOXX) treatment for monkeypox and on the state’s new distribution system.

Dr. Carole Allen, MMS Immediate Past President and Dr. Bisola Ojikutu, Executive Director of BPHC will open the meeting. Participants will also hear from Dr. Larry Madoff, Medical Director in the Bureau of Infectious Disease and Laboratory Sciences, DPH; Dr. Dylan Tierney, Infectious Disease Specialist at Mass General Brigham; Dr. Sarimer Sánchez, Medical Director, Infectious Diseases Bureau, BPHC, and Dr. Aditya Chandrasekhar, a lead physician at Fenway Health and Chair, MMS Committee on LGBTQ Matters, will provide updates and participate in a question-and-answer session.
The objectives of the webinar are to provide general information and updates on TPOXX clinical use and EA-IND process for providers; to strengthen situational awareness of TPOXX availability in Boston, Greater Boston, and Massachusetts; and to identify strategies to support provider sites offering TPOXX and to expand its equitable access TPOXX among Boston and Massachusetts residents.

The call is scheduled for **5:30 to 6:30 PM, Wednesday, September 21.**
